

Utha USA Website — Project Proposal

A modern website for the Bangladeshi community of Salt Lake City, Utah

Proposal prepared August 2026 · Submitted for approval

1. Purpose of This Proposal

We propose building an official website for **Utha USA**, the Bangladeshi community organization of Salt Lake City, Utah. The website will present our community to the world, announce our events, showcase our culture, and — in later phases — grow into a full membership platform.

This proposal covers: what similar organizations across America have (our research), what we propose to build, the proposed design, the phased plan, and the cost. **A working prototype has already been prepared at zero cost and is available for live demonstration.**

2. Research: What Similar Organizations Have

We studied ~28 **Bangladeshi and Bengali community organization websites** across the USA — New York, Texas, Michigan, California, Georgia, Ohio, Boston, and Florida, plus national bodies (FOBANA, CAB). The most instructive examples, and what we propose to adopt from each:

Website	Organization	What we propose to adopt
bam-usa.org	Bangladesh Assoc. of Michigan	Their feature set is the community benchmark (events calendar, gallery, news, member area) — it shapes our proposed page list and roadmap.
badfw.org	Bengali Assoc. of Dallas–Fort Worth	The cleanest visual design in the space; mixes Bangla and English. We propose adopting and extending this bilingual typography.
saikat.org	Saikat, San Diego	Card-style event presentation and the model where membership includes event access.
basgh.net	BASGH, Houston	Page structure and navigation (events, membership plans, prominent join buttons).
banglabiswa.org	Bangla-O-Biswa, Boston	How membership benefits are bundled and displayed as clear tiers.
bangladeshsocietyinc.com	Bangladesh Society Inc., New York	The cultural importance of a visible committee page with names and roles.
baga.net	Bengali Assoc. of Greater Atlanta	Tiered sponsor logo showcase (for a future sponsors section).
banglaevents.org	Bangla Events portal	Event listing and calendar presentation patterns.

The key research finding: not one of the ~28 websites uses modern web design — no scroll animation, no motion, mostly decade-old templates. If Utha USA launches the website proposed here, **we would have the most modern community website in the entire Bangladeshi-American space** — a strong statement for a young organization in Salt Lake City.

3. Proposed Design — "Heritage Modern"

We propose a design that joins Bangladeshi cultural identity with current international web design: Bengal's colors and letterforms, presented with the smooth motion of a modern product website.

- **Colors:** deep Bangladesh green (#006A4E), flag red (#F42A41) as accent, warm cream background, dark ink text — the flag, refined into an elegant palette.
- **Typography:** a modern English typeface (Space Grotesk) paired with Bangla typefaces (Hind Siliguri, Noto Serif Bengali) — including a signature giant উঠা wordmark, connecting our name to both "rise up" in Bangla and our home state of Utah.
- **Cultural motifs:** hand-drawn alpona (আলপনা) medallions as decorative elements; a moving ribbon of festival names in Bangla; bilingual section headings.
- **Modern motion (scroll-driven):** a scroll progress bar; a hero that reacts to scrolling (the উঠা wordmark grows and dissolves, alpona medallions rotate); a statement that lights up word-by-word ending on "আমি বাঙালি"; a pinned section where scrolling slides six full-screen festival panels horizontally; live event countdown clocks; images that zoom gently as they pass; statistics that count up; a frosted-glass navigation bar.
- **Responsible by default:** fully responsive on phones, and every animation respects visitors' reduced-motion accessibility settings.

4. Proposed Features (Phase 1 — the public website)

Page	Proposed content
Home	Animated hero with the উঠা wordmark · community statistics · "next event" section with a live countdown · Bangla festival ribbon · the signature horizontal festival showcase · culture sections · event preview cards · gallery preview · join call-to-action
Events	Our yearly calendar — Boishakhi Mela, Ekushey February, Victory Day, Eid Reunion, Pitha Utshob, Summer Picnic — each with its own page and countdown clock
Gallery	Photo wall of community memories with a click-to-enlarge viewer
About	Our story and mission, values, and the committee with names and roles in English and Bangla
Membership	Information page presenting membership and its benefits (display only in Phase 1 — no payment handling)
Contact	Contact channels, a message form, and an embedded map of Salt Lake City, Utah

PROTOTYPE A fully working prototype of all of the above has been prepared with sample placeholder content, at zero cost, and can be demonstrated live at any time. Approving this proposal means approving the design direction and moving to real content and public launch.

5. Proposed Phases

Phase 1 — Design & prototype **READY FOR DEMO**

The complete public website with the Heritage Modern design and all pages above, using sample content. Built on a modern professional foundation (Next.js) at zero software cost.

Phase 2 — Real content & public launch

Replace sample content with our real logo, photos, committee, story, and first events; purchase the domain name (e.g., uthausa.org); publish on free hosting. **Estimated time: 1–2 weeks after content is provided.**

Phase 3 — Community features

Event RSVPs with automatic email confirmations, a news/announcements section the committee can update, full per-event photo galleries, and an optional Bangla/English language toggle.

Phase 4 — Membership & automation (separately researched and documented)

Online membership signup with digital QR member cards, event tickets with phone-scanner check-in, a treasurer dashboard, and a public transparency ledger. Payment-handling options for organizations like ours have been researched in depth and documented separately (*Utha-USA-Money-Guide.pdf*); this phase proceeds only when the organization decides it is ready.

6. Cost

Item	Cost
Design & development (all phases so far)	\$0 — done in-house
Software licenses	\$0 — fully open-source foundation
Hosting	\$0/month — free tier (sufficient for a community site)
Domain name (uthausa.org or similar)	~\$12 per year — the only recurring cost

7. What We Ask For

1. **Approval** of the proposed design direction ("Heritage Modern") — a live demo of the prototype is ready to show.

2. **Content** — the organization's logo, photos, committee list, our story, and the first real event details.

3. **Domain decision** — approve purchasing the domain name (~\$12/year) so the site can launch publicly.

With these three approvals, the Bangladeshi community of Salt Lake City will have the most modern community website in the Bangladeshi-American space — at essentially zero cost.
